for Mojave

# MacPractice DDS Gen10

## USER SHOW GUIDE TO GREATER NEW YORK DENTAL

Products listed are Mac native unless listed as Future Mac native or bridged (requires Windows and is bridged to MacPractice). Info taken from manufacturers' web sites.

### MACPRACTICE DDS COMPATIBLE SENSORS

**Booth 5026**  
Available from  
MacPractice

QuickRay Mac sensors give the highest x-ray resolution and clarity, and connect directly to USB — no interface box needed. Rounded corners, thin (less than 1/4"), CMOS, polyurethane cable, smooth edges, "the fastest dental sensor on the market."

SOPIX2 sensor provides exceptional image quality. White side stripes offer high sensor visibility. ACE® technology protects each image from overexposure. Sizes 1, 2 sensors available from MacPractice.

**Booth 4827**  
Available from  
MacPractice

X-Mind Unity is ergonomic and easy. The sensor is connected to the IO x-ray head. With patented ACE Technology, over-exposed images are eliminated. SOPIX Inside sensor only uses optimal dose required.

**PLANMECA**  
**Booth 5425**

Planmeca offers ProSensors with a 10 year warranty. Sizes 0, 1, 2.

### MACPRACTICE DDS COMPATIBLE PHOSPHOR PLATE

**Booth 4827**

Introducing to you the PSPIX Intraoral Digital Radiography Phosphor Plate System. This new revolutionary PSP device features:

- Compact and elegant design making it the first true chair side solution for digital radiography
- Exceptional image quality in seconds
- Ideal system for converting existing film users to digital due to the similarities of acquiring images. Increases workflow and eliminates all of the costs associated with developing film

### IMAGING SOFTWARE

Invivo Mac is the most advanced macOS native 3D rendering, viewing and treatment planning software for dental and medical specialists. Diagnose any patient scan in 3D. Learn about the capabilities of Invivo Mac from MacPractice.

### MP DDS COMPATIBLE CAMERAS

**Booth 5026**  
Available from  
MacPractice

The iCam camera is easy to use and works with most imaging software. Unlike most inexpensive cameras which have a short life span, render a mediocre image, and whose capture button does not save an image in your software; the iCam performs admirably. Delivering an excellent image, with its programmable capture button. The iCam is compatible with MacPractice Mojave.

**Booth 4827**  
Available from  
MacPractice

ImageMaster USB is a fully Digital CMOS intraoral camera, flowing pure digital data to your computer and avoiding secondary analog to digital converters. Its widescreen sensor produces vivid colors and outstanding pictures. Just plug it in and it works!

**RF America IDS**  
**Booth 3605**

SOPROLIFE® camera diagnoses caries. SOPROCARE reveals caries, and new and old dental plaque, and reveals gingival inflammation.

The Discovery360 is one of the most advanced intraoral cameras in the market today.

### MACPRACTICE DDS COMPATIBLE PAN/CEPH & CONE BEAM

**Booth 4827**

ACTEON® presents its new X-MIND® TRIUM panoramic dental unit which can be upgraded to 3D (CBCT) and/or cephalometry. It has a full range of medium FOV sizes to facilitate 2D and 3D examinations.

Planmeca offers high quality digital ProMax panoramic, cephalometric, and cone beam equipment.

### OTHER

The Dental R.A.T. is a simple foot-operated mouse that enables the most effective, consistent, hands free-periodontal charting solution available.
